INSTRUMENT SERVICES & SUPPORT

SERVICE

EXPERIENCE THE CONVENIENCE OF UNBIASED MULTI-VENDOR SUPPORT

We are Scientists we know labs. Pace Analytical is first and foremost a laboratory company. With 40 years of laboratory operations experience, OEM traceable training across many manufacturers, and a broad range of service options we are the go to resource for laboratory service.

Services: Preventative Maintenance, On-Site Repairs, Qualifications (IQ, OQ/PQ), Metrology, Cleanroom Validations, Depot Services

Equipment: GC, GC/MS, HPLC, LC/MS, LC/MS/MS, IC, UPLC, ICP-MS, Dissolution and more

Manufacturers: Agilent, HP, Waters, Shimadzu, Perkin Elmer, Varian, Hanson, AB Sciex, Dionex, Distek, Thermo and more

THE HELP YOU NEED. AVAILABLE WHERE AND HOW YOU NEED IT.

SERVICE AGREEMENTS

Traditional service contracts are a great way to ensure your instrumentation stays in peak condition. Customizable plans including maintenance, repairs and qualification options.

TIME AND MATERIALS

Fast and accurate service when you need it. Excellent response times and a vast knowledge of legacy and new instrumentation.

DEDICATED RESOURCE

A dedicated Pace Professional who knows your equipment, an excellent option for larger labs looking to consolidate vendors and ensure maximum up time.

ON-SITE AND REMOTE SERVICES

WORKING TOGETHER TO PROTECT WHAT MATTERS

Amid the COVID-19 outbreak, we are finding that many of our business partners and customers are looking for support in maintaining lab operations while workload demands shift. While these are not "business as usual" times, Pace is available to help.

Our large and flexible national network and extended service capabilities means we can quickly accommodate your needs through a variety of lab service and workforce demand options.

By utilizing our remote lab services, we will set up a program for your internal lab work to be performed at a Pace location(s).

Additionally, our trained professionals can provide remote technical support to your on-site labs. Options include instrument depot repairs, technical instrument support, scientific process outsourcing of laboratory functions and more.

During these challenging times, our priority is to keep our employees, our customers, and communities safe. We know you have the same goals. Let us know how we can help.
